## PROFESSIONAL SUMMARY

Second-year BCA student (CGPA: 8.2/10) with hands-on experience developing full-stack web applications using MERN, Django, and REST APIs. Built and deployed multiple projects featuring real-time communication, database integration, and scalable backend functionality. Seeking Full Stack Developer internship opportunities to apply practical development skills in real-world environments.

## EDUCATION

### BCA — Computer Application

ST Xavier's College of Management & Technology | Affiliated to Aryabhata Knowledge University  
Relevant Coursework: Data Structures & Algorithms • DBMS • MERN • Computer Networks • OOP with Java • Software Engineering  
2024 - 2027 (Expected) | CGPA: 8.2 / 10

## TECHNICAL SKILLS

|                |                                                                               |           |                                                                       |
|----------------|-------------------------------------------------------------------------------|-----------|-----------------------------------------------------------------------|
| Languages      | JavaScript (ES6+), Python, HTML5, CSS3                                        | Frontend  | React.js, Tailwind CSS                                                |
| Backend        | Node.js, Express.js, Django, REST APIs                                        | Databases | MongoDB, MySQL                                                        |
| Devops & Cloud | Git, GitHub, Docker (basics), Vercel, Render                                  | Tools     | Git, GitHub, VS Code, Postman, Figma                                  |
| Soft-Skills    | Analytical Thinking, Problem Solving, Leadership & Coordination, Adaptability | Concepts  | JWT Auth, API Integration, Real-time Communication, Responsive Design |

## PROJECTS

### 1. Campus Connect

**Technologies Used:** MERN Stack, Socket.io, MongoDB, Node.js, Express.js, React.js

**Description:** Developed a full-stack campus networking platform designed to improve communication and interaction among students through real-time features and targeted engagement.

#### Key Contributions & Features:

- Developed secure user authentication and profile management functionality.
- Implemented **real-time chat system using Socket.io** for instant communication.
- Built **typing indicators and notification systems** for better user interaction.
- Designed responsive UI components and integrated backend APIs.
- Optimized data flow and application structure for smooth user experience.

### 2. Wedding Marketplace

**Technologies Used:** MERN Stack, MongoDB, Express.js, React.js, Node.js

**Description:** Built a marketplace platform that connects users with wedding vendors and services through a centralized system.

#### Key Contributions & Features:

- Developed vendor listing and service browsing functionality.
- Implemented dynamic rendering and optimized data loading.
- Built responsive user interfaces for improved usability across devices.
- Integrated backend APIs and database connectivity for managing service information.

- Structured application components for scalability and maintainability.

### **3. Tooth Corner**

**Technologies Used:** Django, Python, HTML, CSS, JavaScript

**Description:** Designed and developed a dental clinic website focused on improving online presence and appointment accessibility.

**Key Contributions & Features:**

- Built responsive front-end pages for service presentation and patient interaction.
- Developed appointment/contact functionality for user engagement.
- Improved UI responsiveness and mobile optimization.
- Organized website structure for easier navigation and better user experience.
- Performed interface cleanup and branding improvements.

## **ACHIEVEMENTS & ACTIVITIES**

- **1st Place** — Web Development Competition | Amity University
- **AI/ML Program** | IIT Ropar
